

## Spotless Spa

WHEN THESE FLORIDA homeowners decided to take the dive to remodel their master bathroom, they desired a clean and bright aesthetic and unfussy functionality. So they hired Brian Raymond of Naples Kitchen & Bath to design the desired look.

Cutting the room to improve the floor plan, Raymond removed the couple's existing outdated cultured marble bathtub. He also reconfigured the location of the vanities, mirrors, and lighting for a more functional and visually pleasing arrangement. In the new layout, a freestanding bathtub with floor-mounted tub filler from Signature Hardware is nestled angled in the corner. On the other side of the room, a frameless glass enclosure reveals a new shower with decorative tile. His-and-hers custom vanities in a soft cream finish from Holiday Kitchens flank the bright white tub and feature quartz countertops with a waterfall edge covering the sides. Oversize frameless mirrors form a reflective expanse above all, brightening the room. Further illuminating the room is a mix of can lights, vanity lights, and toe-kick LED lighting, which glows against the Limestone Grigio matte tile flooring.

While sourcing the right products to achieve the requested style without exceeding the couple's budget proved challenging, Raymond pulled off the remodeling project perfectly and gave this couple the spotless spa they dreamed of creating. «

### SPECIAL FEATURES

## Open and Inviting

WITH RAISING A family and entertaining friends frequently, this couple felt it was time to address and improve their kitchen's form and function. Wanting someone who specializes in creating incredible custom designs, they contacted Brian Raymond of Naples Kitchen & Bath. Offering a one-stop experience, Naples Kitchen & Bath can design, furnish, and install all the necessary components to facilitate a complete kitchen remodel.

Needing to gut the space for a complete renovation, the couple knew their kitchen was in good hands. They requested an oversize island for prep work, serving, and entertaining. To create enough space for the island and to open up the floor plan, Raymond started by removing a wall. He then had to x-ray the concrete slab for post-tension cable to run electrical conduit in the slab for the new island. The designer also relocated HVAC ductwork and sprinklers in order to create a coffer ceiling centered directly over the island.

The open and inviting layout is anchored by the island and functions much better for the family's lifestyle. The design was finished with high-end features and beautiful materials. The creamy quartz counters perfectly complement the custom cabinetry and hood. Other notable elements include a marble tile backsplash, pendant island lighting, and integrated appliances.
